

Going Bananas

Food Safety

Situation

Our customer required a bag that could ripen bananas. More importantly, the bag needed to resist tearing as well as meet FDA food safety standards.

Solution

We provided an USMD brand bag sample (that met FDA requirements) and immediately addressed the problem.

Results

1. Bags sent by other suppliers were simply repurposed trash bags - using one of those could have resulted in expensive and embarrassing recalls.

Services

- Food storage bags
- FSSC 22000
