Guardian™ Film

About

Non-PVC Cost & Performance-Efficient Guardian Film™ Meat Wrap Films are eco-friendlier, 100% recyclable alternative for the conventional PVC Films. Our Films are specially engineered to emulate the virtuous characteristics of the PVC Films as well as provide added advantage of Polyethylene Films like High OTR & Controlled WVTR which keeps the meat fresh and red. Additionally, down-gauging helps in cost savings up to 30-40% & plastic reduction which resonates with the goals of Circular Economy.

Guardian Film™ is odorless, non-toxic, and 100% recyclable Polyethylene Meat and Poultry Tray Wrap Film. Guardian Film™ Meat Wrap Film is manufactured through a specially engineered combination of select food grade polymers and process innovation to make the product free from any taste or odor. Our PE-based PVC-like (PVCL) films are known for their soft feel and are an eco-friendly alternative to conventional PVC-based meat wrap films. Films are used to preserve the freshness of meat and store it conveniently. It has excellent anti-fog and mechanical properties, making it suitable for both automated and manual packaging.

Guardian Film™ Meat Wrap Films run efficiently on all the auto tray wrapping machines. The film works with maximum flexibility on high-speed machines and it gives equivalent throughput as compared to PVC films. Our film is used on a wide variety of trays and ensures a sealed pack with minimum film usage. Guardian Film™ Manual Meat Wrap packaging films are tailored to make wrapping simple and easy for delis, butcher shops, grocery stores, and more using manual meat wrapping machines. Our film rolls are easy to unwind, cuts without releasing any foul burning smell since Manual machine have heating element for cutting the film, helps meat trays get tightly sealed by the bottom hot plate to give professional look to the packs.
